ABOUT ME

In constant training to keep myself updated and learn new technologies and methodologies, trying to maintain a pragmatic and solutions-focused approach that allows me to quickly adapt to new challenges.
I have a professional level of English, prepared to collaborate and communicate effectively in global and multicultural contexts.

EMPLOYMENT HISTORY

Junior Software Developer, AOINK

Mar 2023 — Present

Together with a team of experienced developers, my job is to develop functionality for the company's website using React and perform frontend tasks on the mobile application using C#.

EDUCATION

Associate Degree in Multimedia Application Development, IES PERE MARIA ORTS I BOSCH

Sep 2021 — Jun 2023

During my studies, experienced teachers taught me different programming languages to perform frontend and backend tasks. In addition, I learned to work in a team, communicate and adapt to new development conditions.

Master Degree in Videogame Development , IDesigner Online School

Sep 2018 — Jun 2019

I was instructed in the video game creation processes, especially in Game Design, touching art and programming in Unity3D and Unreal Engine 4. I graduated with distinction.
